

S Prajwall Narayana

Software Development Engineer · Backend & Enterprise Systems · APIs & Databases · CI/CD

Bengaluru, India | prajwallnarayana@gmail.com | +91 7760604439 | [linkedin.com/in/sprajwallnarayana](https://www.linkedin.com/in/sprajwallnarayana) | github.com/Developer1010x | [portfolio](#)

Founding-team software engineer. I build and run the backend services and APIs behind a production ERP-automation product (Python, FastAPI, PostgreSQL), and own the testing, code review, and deployment that keep them running. Two IEEE papers and a Springer publication. B.E. Computer Science & Engineering, graduated Aug 2025.

TECHNICAL SKILLS

Languages: Python, SQL, Swift, Rust, C, Shell Scripting

Backend & Data: FastAPI, REST APIs, PostgreSQL, Relational Schema Design, Microservices, Zitadel (SSO/IAM), RBAC

Engineering Practices: Unit Testing, Debugging, Code Reviews, Agile/Scrum Ceremonies, Git, CI/CD, Observability & Alerting, Incident Runbooks

Infrastructure & DevOps: Docker, OpenTofu (IaC), Ansible, Linux, Linode

AI & ML: LLM Integration, Multi-Agent Workflows, RAG, LangChain, Claude API, PyTorch, TensorFlow, OpenCV

EXPERIENCE

Colligence Research

Nov 2025 – Present · Bengaluru, IN

DevOps Team Lead · Founding Team

Feb 2026 – Present

- Work directly with the founders to scope features and decide what ships, then deliver them against a product that changes week to week.
- Built and operate the production stack end to end (Docker, Zitadel auth, monitored deployments with self-healing alerting and incident runbooks); replaced manual GitHub deploy workflows with CI/CD and infrastructure-as-code (OpenTofu + Ansible) on Linode, cutting deployment errors for a four-person founding team.

Associate AI Engineer · Founding Team

Dec 2025 – Feb 2026

- Built the backend services and REST APIs (Python, FastAPI, PostgreSQL) behind the ERP-automation product, and review teammates' code before it merges.
- Led a small team to ship the company's first multi-agent LLM pipeline for ERP automation, keeping long-running, multi-step workflows reliable without human intervention; saved an estimated 30 hours of developer work.
- Built a code-generation service that parses structured input specifications and emits deployment-ready web applications, eliminating manual scaffolding.

Associate AI Engineer Intern

Nov – Dec 2025

- Prototyped the founding team's first backend and LLM integrations — the foundation the production services were later built on.

Skills: Python, FastAPI, PostgreSQL, REST APIs, CI/CD, OpenTofu, Ansible, Docker, Linode, Zitadel, Linux, Git

RVCE Centre of Excellence

Oct 2024 – Dec 2024 · Remote

Research Intern · AI & Deep Learning

- Built a deepfake-detection model from scratch for manipulated-face video (no external detection APIs), trained and evaluated on the FaceForensics++ and DFDC benchmarks.

Skills: Python, PyTorch, CNNs, Computer Vision, FaceForensics++, DFDC

Ernst & Young India

Aug 2024 – Sep 2024 · Bengaluru, IN

Associate Consultant Intern · Enterprise Cybersecurity

- Shadowed senior consultants on enterprise cloud-security and IAM work, and picked up the TOGAF and IFTAS frameworks along with how cloud security reviews are run.

Exposure: TOGAF, IFTAS, Cloud Security, Identity & Access Management

PROJECTS

Arogya-Sathi · Multilingual Offline AI Healthcare Platform

Jan 2025 – Jun 2025

- Built a 30-language healthcare platform (symptom checking, X-ray fracture detection, prescription summarisation, wellness chatbot; 93% accuracy) running fully offline on quantized models on a Raspberry Pi. 3rd place, college final-year showcase.

Skills: Python, LLaMa 3.2, LangChain, YOLOv8, PyTorch, Streamlit, Raspberry Pi, Quantized Models

Knoves Central · Student Resource Platform

- Co-built a student resource platform delivering centralised notes and academic material, adopted across 12+ departments.

Open-Source & Personal Systems

14 public repos · github.com/Developer1010x

- agentic-devops** — AI-powered CI/CD pipeline generator and monitor for GitHub and GitLab.

- pybridge.ai** — routes AI access across WhatsApp, Telegram, and email from a phone.

- Audio Deepfake Detection** — a model that flags AI-synthesised or cloned speech, trained on public audio-deepfake datasets.

Skills: Python, Swift, Rust

PUBLICATIONS

EduConnect: A Smart Solution for Streamlined School Administrations — Presented at Springer ICTIS 2025, Bangkok (ICT for Intelligent Systems, Vol. 9). Smart school-administration platform: video conferencing, secure chat, interactive content, and personalised learning dashboards for rural schools.

An Empirical Study of ResNet50 Hyperparameter Tuning for Plant Disease Classification — IEEE Xplore, Nov 2024.

ieeexplore.ieee.org/document/10816835

Web-Server Controlled Rover with Robotic Arm and Object Detection — IEEE Xplore, Nov 2024. ieeexplore.ieee.org/document/10816816 *Two more papers under review.*

EDUCATION

B.E. Computer Science & Engineering, R V College of Engineering (VTU), Dec 2021 – Aug 2025.
