

S Prajwall Narayana

AI Engineer

Bengaluru, India | prajwallnarayana@gmail.com | +91 7760604439 | github.com/Developer1010x | sprajwallnarayana.vercel.app

AI Engineer on the founding team at Colligence Research, Bengaluru, working across both halves of the stack. I build the product (multi-agent and LLM pipelines over MCP, a code-generation service, and the Python/FastAPI backends behind them) and I own the platform it runs on, having established the CI/CD, infrastructure-as-code, observability and authentication from scratch. Comfortable taking an ambiguous problem from prototype to a deployed, monitored system. **IEEE- and Springer-published**, with three peer-reviewed papers and two more under review.

TECHNICAL SKILLS

AI & LLM Systems: Agentic Systems, MCP Orchestration, Multi-Agent Workflows, RAG, LangChain, LangGraph, Claude API, LLM Integration, Evaluation Harnesses

Infrastructure & DevOps: CI/CD, OpenTofu (IaC), Ansible, Docker, Linux, Linode, Observability & Alerting, Incident Runbooks, Zitadel (SSO/IAM), RBAC, Git

Languages & Backend: Python, FastAPI, REST APIs, PostgreSQL, SQL, Swift, Rust, Shell Scripting

ML & Vision: PyTorch, TensorFlow, YOLOv8, OpenCV, CNN, ResNet, Quantized Model Deployment

EXPERIENCE

Colligence Research · Founding Team

Nov 2025 – Present · Bengaluru

AI Engineer

Feb 2026 – Present

- Work across the product and the platform: agentic and LLM engineering alongside end-to-end ownership of the infrastructure those systems run on.
- Established the DevOps/SRE function from scratch and now lead it: CI/CD, infrastructure-as-code with OpenTofu and Ansible on Linode, observability, alerting and incident runbooks.
- Replaced manual GitHub deploy workflows, cutting deployment errors for a four-person founding team.
- Operate the production stack end to end: Docker, Zitadel authentication (SSO and RBAC), monitored deployments with self-healing alerting.
- Own system architecture across infrastructure and tooling.
- Building a retrieval-augmented system into the infrastructure layer so that infrastructure-as-code and SRE work (runbook lookup, change context, incident response) is grounded in the organisation's own configuration and history. In progress.

Associate AI Engineer

Dec 2025 – Feb 2026

- Led a small team building the company's first multi-agent LLM pipeline for ERP automation over MCP, keeping long-running, multi-step workflows on track without human intervention.
- Built a code-generation service that parses structured input specifications and emits deployment-ready web applications.

Associate AI Engineer Intern

Nov 2025 – Dec 2025

- Prototyped the first LLM integrations and agent workflows.

Skills: Python, FastAPI, MCP, LangChain, LangGraph, Claude API, Multi-Agent Orchestration, OpenTofu, Ansible, Docker, Linode, CI/CD, Zitadel, RBAC, Linux, PostgreSQL

RVCE Centre of Excellence

Oct 2024 – Dec 2024 · Remote

Research Intern · AI & Deep Learning

- Built a deepfake-detection model from scratch for manipulated-face video, using no external detection APIs.
- Trained and evaluated the model on the FaceForensics++ and DFDC datasets.

Skills: Python, PyTorch, TensorFlow, CNNs, Computer Vision, FaceForensics++, DFDC

Ernst & Young India

Aug 2024 – Sep 2024 · Bengaluru

Associate Consultant Intern · Enterprise Cybersecurity

- Shadowed senior consultants on cloud-security and identity and access management work.
- Exposure to the TOGAF and IFTAS frameworks.

Exposure: Cloud Security, Identity & Access Management, TOGAF, IFTAS

EDUCATION

R V College of Engineering (VTU), Bengaluru

Dec 2021 – Aug 2025

PROJECTS

Arogya-Sathi · Offline-Capable Multilingual AI Healthcare Platform

Jan 2025 – Jun 2025

- Symptom checking, X-ray fracture detection, prescription summarisation and a wellness chatbot, running fully offline on quantized models and demonstrated on a Raspberry Pi. Third place, college final-year showcase.
- Built a deterministic, rule-based drug-interaction and crisis-detection safety layer that the LLM cannot override.
- Built a 62-case labelled evaluation harness that scores those safety layers and wired it in as a CI merge gate at recall 1.00; building it surfaced a real missed self-harm disclosure. Crisis detection recall 1.00 / precision 0.93; emergency 1.00 / 1.00; drug screening 1.00 / 1.00.
- A LangGraph pipeline turns an uploaded medical report into a plain-language explanation in the patient's own language, with a self-verification loop; requests are routed across local Ollama models.

Skills: Python, LangGraph, Ollama, Quantized Models, PyTorch, YOLOv8, OpenCV, Evaluation Harnesses, CI Gates, Raspberry Pi ·

github.com/Developer1010x/Arogya-Sathi

agentic-devops · AI-Powered CI/CD Pipeline Generator and Monitor

- Generates and monitors CI/CD pipelines for GitHub and GitLab repositories.

Skills: Python, CI/CD, GitHub, GitLab, Agentic Systems · github.com/Developer1010x/agentic-devops

Knotes Central · Student Resource Platform

- Student resource platform delivering centralised notes and academic material, adopted across 12+ departments.

Skills: Python, Web Platform

Other Open-Source Work

- **pybridge.ai**: routes AI access across WhatsApp, Telegram and email so it can be driven from a phone.
- **LLM Terminal**: a lightweight terminal-based LLM assistant.
- **Audio Deepfake Detection**: flags AI-synthesised or cloned speech.

Skills: Python, Swift, Rust, PyTorch, LLM Integration · github.com/Developer1010x
